EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Amend the Title of the Invention to read:

METHOD AND CIRCUIT FOR PROGRAMMING ELECTRONIC DEVICES

DETAILED ACTION

2. Claims 1, 3 – 5, 7, 10, 20, 24, 25, 27, and 28 are pending.

Response to Arguments

3. Applicant's arguments, see pages 6 – 8, filed 26 April 2010, with respect to claims 1 and 20 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Information Disclosure Statement

4. The information disclosure statement (IDS) submitted on 17 March 2010 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner. Please note, Citation No. 2 "Notice of Final Office Action issued January 5, 2010 during examination of the corresponding

Art Unit: 2181

Japanese patent application No. 2004-067163" was not considered and therefore lined through by the Examiner because neither an English language translation nor statement of relevance has been provided for the reference by the Applicant.

Allowable Subject Matter

5. Claims 1, 3 – 5, 7, 10, 20, 24, 25, 27, and 28 are allowed.

6. The following is an examiner's statement of reasons for allowance:

Claims 1, 3 – 5, 7, 10, 24, 25, and 27 are allowed because the prior art of record fails to teach or suggest alone or in combination ***transferring command information only to the programmable memory controller circuit, wherein the programmable memory controller circuit receives only command information***, as required by independent claim 1, ***in combination with the other claimed limitations*** (emphasis added). The prior art of record, US Patent No. 6,910,109 (hereinafter Holman), teaches sending access information to a memory controller, but wherein the access information includes a memory address of the access (Holman; Col 3 Lines 44 – 48). Applicant's claims clearly state that command information is separate from data information and address information, and that ***only*** command information is sent to and received by the programmable memory controller circuit. The memory address of the access of Holman would be considered address information, which is not sent to or received by the memory controller of Applicant's claims.

Claims 3 – 5, 7, 10, 24, 25, and 27 are allowed because of their dependency upon allowed independent claim 1.

Claims 20 and 28 are allowed because the prior art of record fails to teach or suggest alone or in combination ***transferring command information only to the controller circuit, wherein the controller circuit receives only command information***, as required by independent claim 20, ***in combination with the other claimed limitations*** (emphasis added). The prior art of record, US Patent No. 6,910,109 (Holman), teaches sending access information to a memory controller, but wherein the access information includes a memory address of the access (Holman; Col 3 Lines 44 – 48). Applicant's claims clearly state that command information is separate from data information and address information, and that ***only*** command information is sent to and received by the controller circuit. The memory address of the access of Holman would be considered address information, which is not sent to or received by the memory controller of Applicant's claims.

Claim 28 is allowed because of its dependency upon allowed independent claim 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
